THEORIES AND METHOD OF EVALUATING REGIONAL ECOSYSTEM ENVIRONMENT SERVICE ECONOMIC VALUE

REN Zhi-Yuan (College of Tourism and Environment Sciences, Shaanxi Normal University, Xi'an 710062, Shaanxi, China)

The function of ecosystem environment service is an importance part of the system that the Earth life supports, the existence and development of social sub-system depend on the equilibrium and regulated mechanism of the economic environment. According to analyzing the relation of mankind society increasing and environment ecosystem, discussed the meaning of the region ecosystem research, front along the problem and ecosystem environment service function. From the theories of the ecosystem function performance economic value evaluation, established the evaluation index system? evaluation method system and technique route of district ecosystem service. Pointing out the district ecosystem performance evaluation, not only considers the type of ecosystem system, but also thoughts of the quantity grade of main factor environment. Then to promote the research of the value of the district ecosystem environment, establishes the foundation for finding the economic bank and evaluating ecological value of our country.

【Key Words】 : **function of the ecosystem environment service economic evaluating theories and method**

【Fund】 : 教育部重大项目 [2 0 0 2DXM770 0 12]; 陕西师大重点项目

【CateGory Index】 : F062.2
