# Advance in Researches on Forest Ecosystem Services—Theory and Method

Li Shaoning Wang Bing Zhao Guangdong Cui Xianghui Bai Xiulan (Research Institute of Forest Ecology, Environment and Protection, CAF, Beijing 100091, China)

The intension of ecosystem services is the effectiveness and the natural ambient conditions of human survivable necessary formed and maintained during the course of the development of ecosystem. While at present, the forest ecosystem, which is the biggest and the most important ecosystem in the land ecosystem, is being studied mostly. This paper reviews and introduces the concept, the intension and the appraising index of forest ecosystem services, as well as the appraising indexes and the method of economic value assessment. At the same time, the author also put forward the opinion on these. The value of fully recognizing forest ecosystem services has significant theoretical and realistic significance.

【Key Words】 : **ecosystem services forest ecosystem intension evaluation**

【CateGory Index】 : S718
