YUE Wen-cong,XU Lin-yu(State Key Joint Laboratory of Environmental Simulation and Pollution Control,School of Environment,Beijing Normal University,Beijing 100875,China)

Green GDP,bringing the cost of resource and environment into GDP,is an effective economic way of environmental protection. There is a technical difficult point on how to correctly value the cost. Accounting the cost becomes a hot issue in the research field of ecological economy recently. This paper summarizes two different approaches of accounting Green GDP, which bring the cost of environmental pollution and resource loss from GDP and put the value of ecosystem services into GDP. The paper also develops prospect of accounting Green GDP, putting the cost of environmental pollution, resources loss and benefits of ecosystem services into Green GDP.

【Key Words】 : **green GDP accounting methods ecosystem services**

【Fund】 : 国家重点基础研究发展计划(973)(编号:2005CB724204)
