# Research of Green GDP Accounting in Wuyishan City Based on Ecosystem Services

YUE Wencong, XU Linyu, ZHAO Xu (State Key Laboratory of Environmental Simulation and Pollution Control, School of Environment, Beijing Normal University, Beijing 100875, China)

Since 1960's, there have been some global environmental issues, such as resources shortage, environment pollution and so on. It is essential to value natural capital and putting it into economic accounting system. This kind of research is always known as Green GDP accounting. This paper summarizes approaches of accounting Green GDP based on ecosystem services and introduces a new method of accounting Green GDP, which puts the value of direct ecosystem services (DES) into GDP. The method can reduce possibility of double counting in Green GDP accounting system. Taking Wuyishan City as an example, the paper calculates Green GDP of the city in 2005. It is showed that Green GDP of Wuyishan City is 15.32 billion Yuan RMB, which is four times more than its GDP of the same year.

【Key Words】 : **Green GDP accounting methods ecosystem services Wuyishan City**

【Fund】 : 国家重点基础研究发展计划(973)(2005CB724204)

【CateGory Index】 : F127;F222.33
